PROFESSIONAL SUMMARY

BSc (Hons) Software Engineering graduate with hands-on project experience building full-stack applications using React, Node.js, Express.js, MongoDB, and PostgreSQL. Strong grounding in Object-Oriented Programming through Java, with a proven ability to quickly pick up new frameworks and tools. Seeking a Full Stack Development Internship to apply existing frontend and backend skills while growing into TypeScript and NestJS in a collaborative, fast-paced team environment.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js

Backend & Database: Node.js, Express.js, REST APIs, MongoDB, SQL, PostgreSQL, SQLite, Supabase

Programming Concepts: Object-Oriented Programming (OOP), Java

Mobile & Other: Flutter, Stripe API Integration, Groq AI

Tools & Deployment: Git, GitHub, JWT Authentication, Vercel, Render

Currently Learning: TypeScript, NestJS

Professional Skills: Problem-Solving, Communication, Project Management, Data Analysis, Leadership

PROJECTS

Job Application Tracker | Full-Stack Web Application

Sep 2026

React.js, Node.js, Express.js, MongoDB, JWT

- Developed and deployed a full-stack job application management system enabling users to securely register, log in, and track applications through a personalized dashboard.
- Built a RESTful API with Node.js and Express.js, using MongoDB Atlas with Mongoose for secure, user-specific data storage.
- Implemented JWT-based authentication with bcrypt password hashing, plus full CRUD operations, application status tracking, search/filtering, and dashboard statistics.
- Deployed the frontend on Vercel and backend on Render, using Git and GitHub for version control.

Mobile Blogging Application

Mar 2026 – Jun 2026

Java, SQLite, Stripe

- Developed a professional offline-first mobile blogging application with secure user authentication and local SQLite data persistence.
- Applied Object-Oriented Programming principles in Java to structure a maintainable, modular codebase.
- Built a feature-rich story editor with camera and gallery integration, plus multi-category search to improve user experience.

Career Buddy

Nov 2025 – Jun 2026

Flutter, Supabase, PostgreSQL, Groq AI

- Built an AI-powered career guidance platform offering personalized university recommendations and mentor connectivity.
- Designed and queried a PostgreSQL database via Supabase to manage student, mentor, and recommendation data.
- Integrated the Groq AI API to generate personalized career planning resources for students.

Travel Platform for Sri Lanka Tourism

Dec 2025

HTML, Next.js (React), CSS, JavaScript

- Developed an interactive React-based travel platform showcasing Sri Lanka's top destinations and tour packages.
- Designed a modern, responsive UI with dark mode, smooth scroll animations, and dynamic card interactions.

EDUCATION

BSc (Hons) Computer Science, Software Engineering (Top-up)

2025 – 2026

University of Wolverhampton

Higher National Diploma, Software Engineering <i>Cinec Campus</i>	<i>2023 – 2025</i>
Diploma in Management and IT <i>Saegis Campus</i>	<i>2022 – 2023</i>
G.C.E. Advanced Level (A/L) <i>Ananda College, Colombo</i>	<i>2023 – 2025</i>
G.C.E. Ordinary Level (O/L) <i>Ananda College</i>	<i>2021 – 2022</i>

LANGUAGES

English, Sinhala
